Art Unit: 3641

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a blasting method, classified in class 102, subclass 312.
 - II. Claims 10-18, drawn to a bore hole loading method, classified in class 102, subclass 313.
 - III. Claims 19-24, drawn to an explosive, classified in class 149, subclass 46.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II, do not use the composition of Group III, but use a different explosive.

Groups I and II have some subparts in common but differ overall in the total design, or as to the inventions as a whole. Looked at in another way, Groups I and II are different combination methods, with differing broad and narrow recitations, such as to be $A_{sp}B_{br}$ vs. $A_{br}B_{sp}$, which are separately patentable. Group I is a method of perimeter blasting with no limitation on the amount of energy reducing ingredient, while Group II is loading a single borehole without blasting and with specific limitations on the amount of energy reducing agent. Also, the predetermined formulations of the explosives are clearly subject to being and would be varied, differing depending on the specific blasting requirement for in hole storage, single vs. plural (as perimeter) patterns, etc.

If applicants state that Groups I and II are not patentably distinct, they would be rejoined, but this statement would be effective for all purposes, including that of 35 USC 103.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3641

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
6. Any inquiry concerning either this or an earlier communication from the Examiner should be directed to Examiner Edward A. Miller at (703) 306-4163. Examiner Miller may normally be reached Monday-Thursday, from 10 AM to 7 PM.

If attempts to reach Examiner Miller by telephone are unsuccessful, his supervisor Mr. Carone can be reached at (703) 306-4198. The Group fax number is (703) 305-7687.

If there is no answer, or for any inquiry of a general nature or relating to the application status, please call the Group receptionist at (703) 308-1113.
